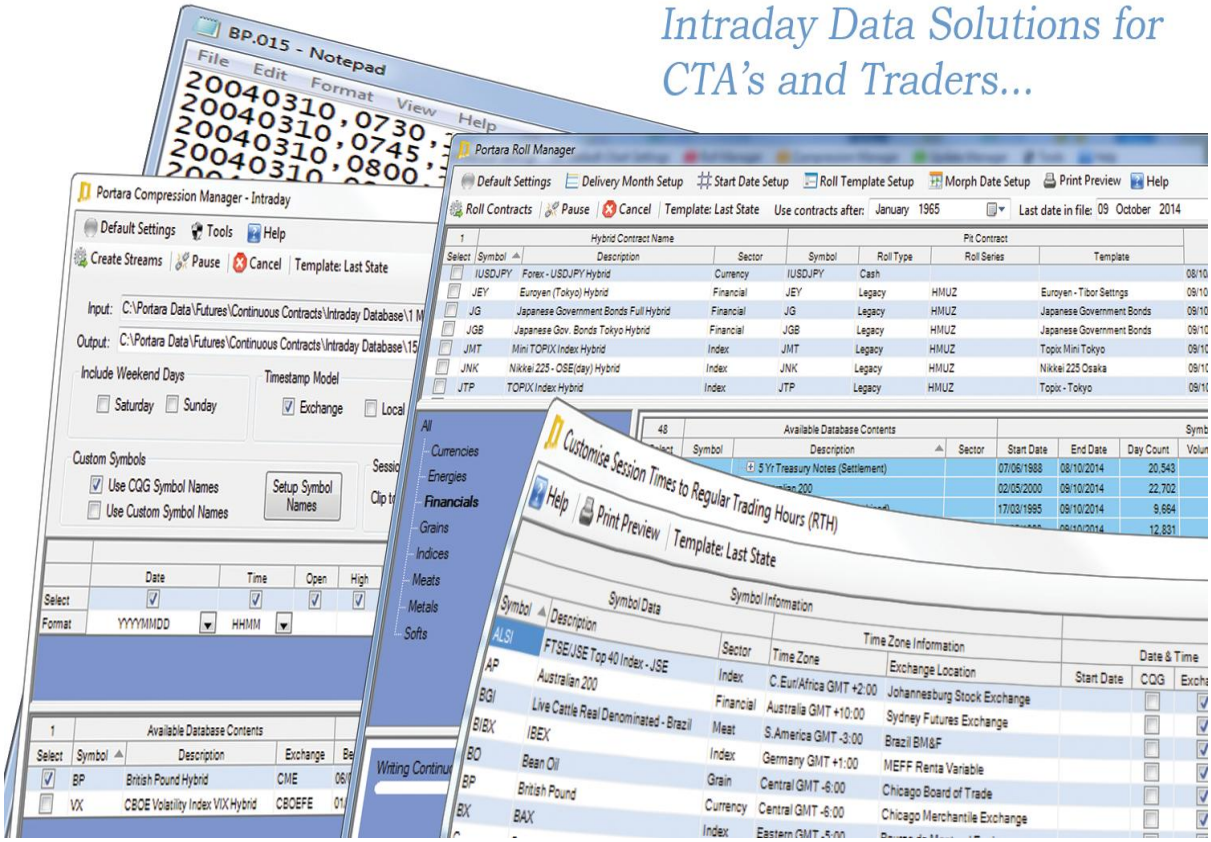
Intraday Data Solutions for CTA's and Traders...



Arthur Maddock – CEO Portara

"Several years ago I designed, coded and developed the Portara historical data platform for my own fund simply because there was nothing else suitable in the world for CTA's or hedge fund managers to work with at this level — CQG didn't do it back then — But that's all changed...

Presenting PORTARA your perfect historical intraday and daily database solution..."

PORTARA POWERHOUSE WITH CQG | DATAFACTORY

Database Contents & Asset Classes

400 liquid Intraday & Daily CQG Datafactory futures, cash, ETF's & FOREX with trade volume. Market inception – 1987 (intraday) and 1965 (daily) . Access to global exchanges.

Roll Manager

Create ASCII TXT, CSV intraday continuous data back to market inception. Full control over roll parameters including 'read dates from txt file' function. Roll at end of session or on daily settle. Audit logs and full transparency.

Compression Manager

Control your formats, column order, and much more... Compress to any timeframe – 1 min, daily and above. Randomise opens and closes for robustness and statistical testing.

Session Manager

Apply user-based open and closing session times. Cut away unwanted, illiquid evening or night sessions historically. Create RTH data from your 'All Sessions' data. Form daily and intraday sessions that are valid to cross midnight. Template all Portara settings for multi-system appraisal or the needs of other researchers.

Auto Updates — Roll & Compression Automation

Automate your extractions and updates. Portara contains a batch file and a command line facility. Updates from CQG are timely after markets close including four independent global zones per day.

PORTARA
POWERHOUSE WITH
CQG | DATAFACTORY

Benefit from — Timestamp Management

Extract in local or exchange time to suit your trading team. Historical dual DST differences, equinox differences, southern hemisphere differentials – they are ALL resolved. Global UTC and Zulu are included as standard.

Benefit from — Local Databases

Databases are local to your machine saving you internet and network frustration. Save time and lower costs. Transfer extracted data easily between your team!

Benefit from — Subscription based payments

Subscribe to Portara and save massively compared to a typical flat-file CQG Datafactory spend. Up to 100-fold reductions.

Benefit from — A Licence Share as standard

We know the importance of data flexibility .Share your extracted data with your R&D team with up to 5 persons across a single licence.

Benefit from — Actual and Continuous Data Extractions

We can provide any solution to suit your needs. Talk to us...

Benefit from — Highly discounted pricing

Based on your requirements we will tailor something to fit any budget.
